

PROJECT ~~SECRET~~ Approved For Release 2000/08/08 : CIA-RDP96-00789R000300450002-8

1312

DATE: 26 FEB 87  
SESSION: 01  
SOURCE: 021SANCTUARY: ---  
TARGET:         
FINISH:       

SG1A

COORDINATE:       

## FRONTLOAD:

"This will be a new target and will probably require multiple sessions to complete. For this reason don't feel as though we have to solve the whole problem in one session."

\* Increasing heater noises as temp drops

## NOTES:

- ① No known or stated inconveniences - tenseness  
"PISSED TODAY" unknown whether it will affect session
- ② Clear, sunny, a little chilly, weather will cloud up later (forecast) & it is changing

DRAFT:         
TYPING:         
PROOF:

PROJECT FY 8706

INTERVIEW/monitor TASKING

1. Describe (locate and identify) any "new" activity in the  
'Industrial like' complex of structures via:

103

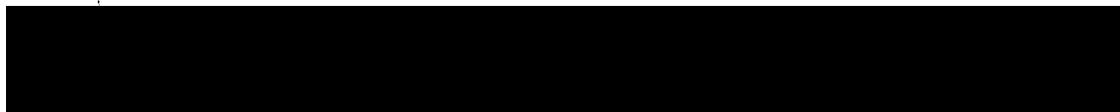

██████████ SG1A

2. To be announced

NOTE: This place is like Disneyland, so work  
slowly and carefully.

Approved For Release 2000/08/08 : CIA-RDP96-00789R000300450002-8

SG1A

- ★ Like I'm looking down on top of a large city, different shapes, tapering heights, seem to be in a large city, very tall buildings, closed in crowded feeling, buildings are mixture of old, grey block and more sleek & modern, a foreign feeling-
- Tell me about the foreign feeling
- ★ Things are different, heavy drab clothing, cars are different, like a boulevard, with trees, a dirty feel like from soot from coal, cold and damp here. Some of the side streets are very narrow, its land locked. No large body of water in the area, no coast or port. I see a vision of a tall spire, four sided, with like tile, very prominent. ✓
- Tell me about this thing you call a tower
- ★ Its like on top of a building AOL like a church. There is a thing on top like a ball. It stands on top of the other roofs
- Ball raw data
- ★ Spherical, round, it has some thing around it like a ~~cover~~, with something coming out like a weather vane
- Continue to tell me about this thing you call a tower.
- ★ Broader at the base than the top, like scales or patterned tiles along the sides; nothing very remarkable about it. Its just prominent
- Continue to move around the area. Describe those things of interest to me.

★ There is a small brick building, six-seven stories, enclosed by fence, a small flat enclosure just inside the fence ~~as~~ like a sentry. The gate is wide enough to let in larger vehicles, not just cars. Area around the building is open - other buildings - There is a ~~lot~~ <sup>lot</sup> of space and other buildings don't infringe on it. Square looking building almost as long as it is tall, a doorway in the center. There are other buildings but they are several hundred yards away -

→ ~~But~~ - We will call this Building 1, recall this structure as Building 1. Continue to focus around the area, describe those things that interest me.

★ There is another area related in some way to this area. Earth is dark and mushy, heavy unpleasant odor, silver pipes, tubes, big cylinders and tanks ~~as~~ tell me oil refinery you see on the turnpike. Tall, cylindrical object, broader at the base than the top -

→ Tell me about the unpleasant odor

★ It's a stench, accio, like a smell you breath through your mouth so you can't smell it - decaying, sour smell

→ cylindrical object

★ If I'm standing up next to it, it's very tall, it's hollow inside like a tube, solid, not open from the outside - impression of mountains in the background -

→ We will call this the cylinder site - recall this as the cylinder site. Continue to focus around. Describe those things that interest me

4

- ★ Mtn in the background - maybe some water in the distance.  
An odd looking ball in the distance
- Tell me about the ball
- ★ Its white, sits alone, a narrow road leading up to it.  
There is an energy flowing to it - AOL like antenna -  
tracking signals -
- Describe to me this thing you call an antenna
- ★ Its round, white, hollow inside, like a compass here,  
pattern like little dots - support braces to the ground.  
Like a valley ball in shape - close to the ground - sort of  
sits there - out in the middle of nowhere - at a high  
altitude - air is clean and fresh here - no sounds -
- Know this as the Ball site - Recall it as the Ball site -  
Leave it now - and go to the area which interests me -
- ★ Its all mushing together
- focus at 1394 941
- ★ The next place I'm attracted to is a modern, sleek  
building, a lot of glass, odd shape, curved, tall, but a  
crescent type curve, not round but a crescent like  
curve - a lot of people here - powerful people - an  
international feel - I see a fleeting glance of a black  
person, shawl, a cape - stages - white flat top cap -  
some time, white complexioned person - quite a contrast

→ Describe the building

★ Modern, lot of glass, an overhang over the door -  
revolving door - the building has a curvature, many  
stone walls, the roof is flat but like there is another  
stone wall on top of it

3

- ★ It's very modern inside - black, charcoal marble - A lot of greenery, much contrast to older buildings - like going from old European (German) city to downtown Los Angeles - Emblem on the building, I can't make it out - it's gold and it's blue - not very distinct
- Tell me about the people
- ★ Stressed pressure feeling, like they were rushing about, crisis management, maybe this is an office building of some sort - it's hard to get to them
- I just need you to describe them
- ★ Very white collars, very professional
- We will call this the glass building - Recall it as the glass building - leave it now and go to the other area -
- ★ I hear the sounds of planes I think - I'm trying see if there is an airport
- Don't look for the airport - only describe what you perceive -
- ★ nothing
- Tell me about the other structures
- ★ I'm getting confused - mixing them all up
- Go to the first building - the brick building, describe the inside
- ★ like an institution or government building, drab, boring colors, undecorated walls, monochromatic, A1 brick yuck, glaring lights
- Tell me about the activities

★ Government type building, a person in a uniform but not a soldier, like a guard, a policeman at the junction of a corridor - long corridor, doorways of the corridor - last door has writing - black letters - I can't read it - textured glass - metal cabinets like safes - two people here - a man and a woman - He is in charge here - you go to ~~him~~ him with a request and he will find it - She is sitting - has drawers in front of her - AOC like a card catalogue - She seems to be keeping track of things - The room is filled with cabinets - looking for another room -

→ go ahead

★ I feel floaty now and then and have trouble pretty things with words - There are different offices here - doors are open - you walk down and get glimpse of offices with a desk inside - like ante-rooms leading into other rooms - First level seems to be more of admin feel to it - General purpose offices - have to do with building as a whole -

→ pull away from this building - go up in the air - fix the ~~belated~~ location of the various sites -

First impression was of an older city with a  
foreign European feel - the dress of the people (duhac,  
there were more shorts than here) and autos on the  
street (about like AOL 1940s vintage Packards).  
There was a wide boulevard with a center strip  
holding trees.

First specific location was a tower a steeple-like  
structure. 4 sides, wide at base, tapering to  
top. There was a grotto down the sides of this  
like this a shingle roofed made. There was a  
bell on top of the structure with a ring around  
the circumference and a parapet from the  
top of the bell. The tower stood taller than the  
flat roofed building that was in close proximity.

Second structure was a flat topped, fenced,  
one polished brick building of several stories.  
The main entrance in front. Stair-like entrance  
had a wide opening as if to permit entry of  
large vehicles. There was also a garage in  
cupola inside the compound at the opening.  
First floor inside building consisted of general  
purpose offices of main corridor. No further  
description.

Next structure was at a distance from  
the brick building and was in a very open  
area. There were geometric patterns of pipe-like  
apparatus close to the ground. The ground  
was black, dry and mushy. A very strong  
ranked maple-leaf odor permeated the area.  
At the far end was a large circular structure,  
like a storax tank a ft. There was also a  
tree slender, hollow sounding tube or  
cylinder at the far end and to the right.

Next area was mountainous. Large hollow rounded  
Approved For Release 2000/08/08 : CIA-RDP96-00789R000300450002-8 shapes.  
A narrow dirt road led to the hill. There was

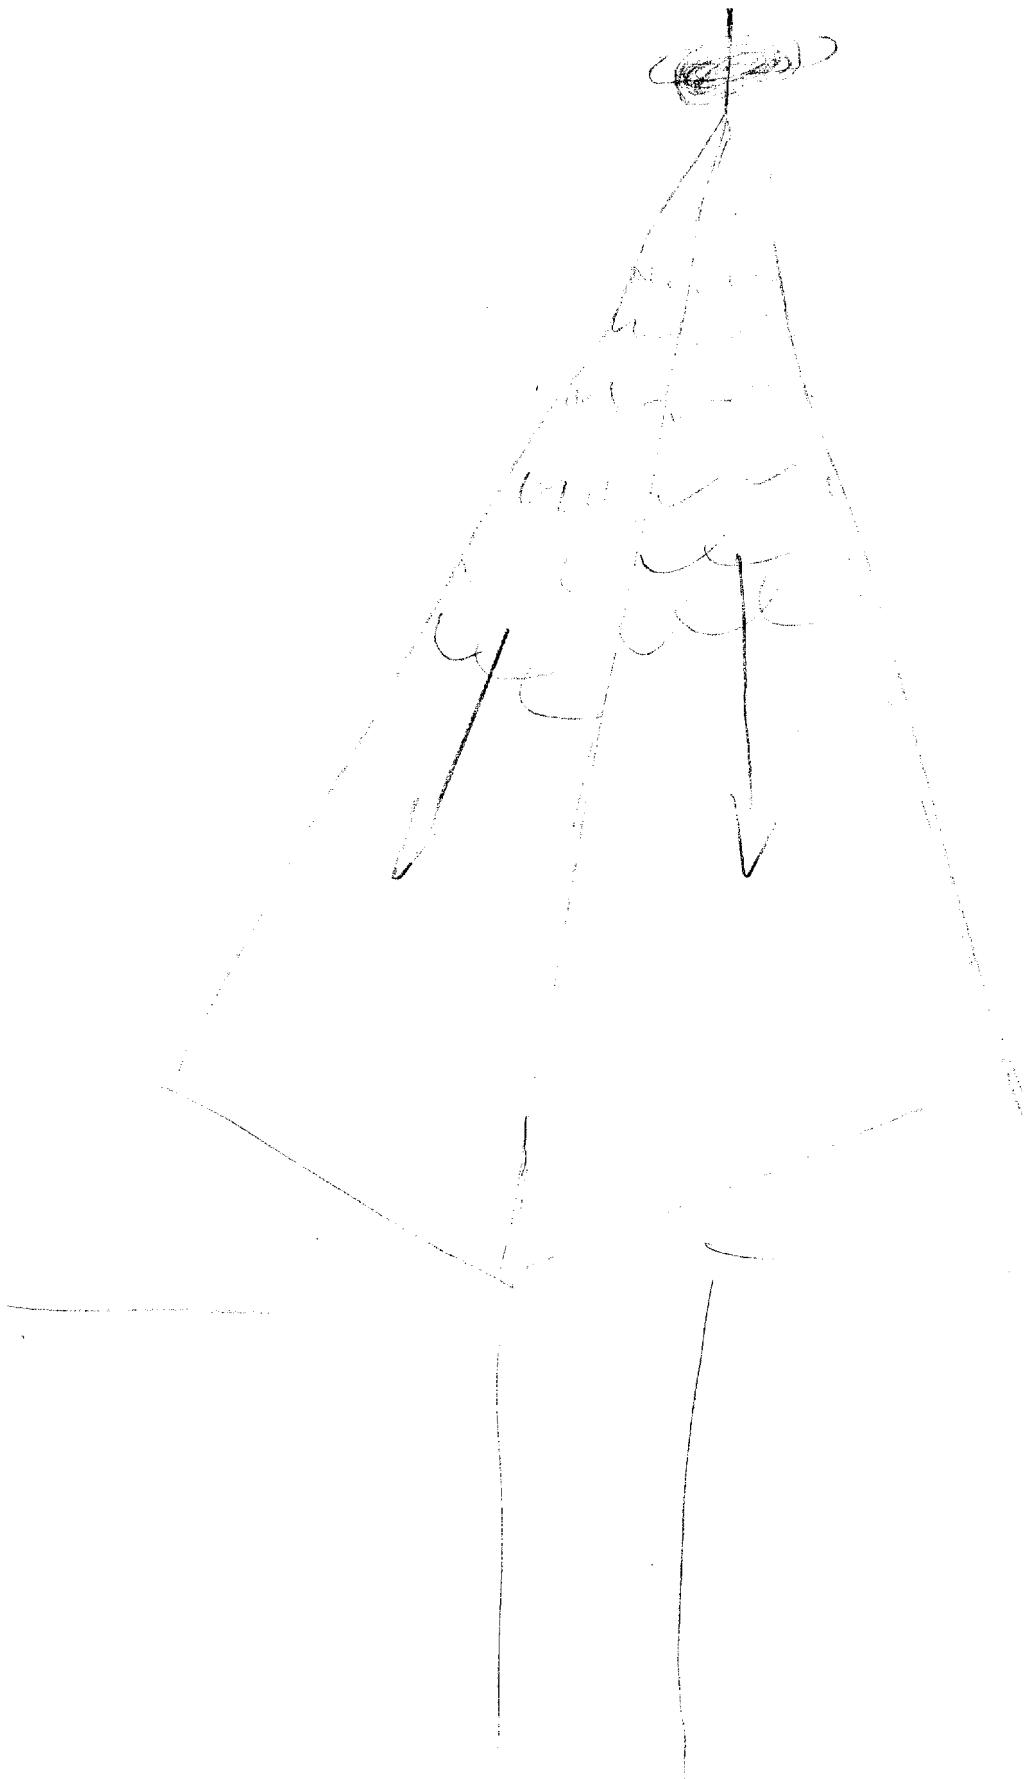

A feeling of something growing out or being  
attached to the tail. An like an antenna.

That structure was a very tall, very modern,  
glass structure. There was a definite curvature  
to the structure. This structure was in a very  
urban area (more people, traffic sounds, etc.).  
Mixture of people (Nationality) associated with  
this structure. There was a strong feeling of  
stress, pressure and chaos (in the sense of  
pushing) associated with this structure.
